

Flow Tester

Model FT-5/10

The DRTS Flow Tester can test any type of emitting device from drip tubing and drip tape to button drippers and sprinklers. Using load cells to measure the collected water allows a very high accuracy of flow measurement in the shortest possible time as samples are tested simultaneously.

Specification

- **Testing diameters:** 12-25mm
- **Programable tests and recipes**
- **Up to 30 different test pressures**
- **Gives a full testing report with graphs and analysis**
- **ISO 9260 and ISO 9261**
- **Testing Method:** By Weight
- **Control:** PLC
- **Supported capacities:** 0-30, 30-120liter/hour
- **Pressure range:** 0-8bar (0-116 psi)
- **Measurement accuracy:** 1% for single measurement
- **Pressure accuracy:** 0.1 meter (1Kpa)
- **Air supply:** 6.5bars
- **Available in 5 or 10 station**
- **Optional temperature controller**
