

Re-Coiler

For Flat Pipe and Drip Tape

The DRTS Re-coiler is designed to give manufacturers the ability to re-coil unfinished coils or create short coils from a larger coil. This machine reduces your scrap rates by allowing you to utilize the good sections of a produced coil which would normally be scrapped.

Specification

- **PLC Control Unit:** SIEMENS S 7200
- **Coiling:** Single Station
- **Touch Panel:** Siemens 4,2"
- **Motor for Coiling:** 0,75kW
- **Drivers:** LENZE 8400
- **Coiling Speed:** Average 200m/min
- **Torque Control:** Digitally controlled disk brake system to keep constant torque during winding
- **Dancer:** Included
- **Coil Width:** Adjustable
- **Low Tension Adjustment:** Available
- **Digital Length of Coil**
- **Servo Motor Traverse Control System**
- **Mobile and Easy to move around**
